PROJECTS

Marshmello - Full-stack management application built with React, Node.js, and MongoDB, featuring API integrations, WebSockets, and an AI agent.

SimplePen - Frontend project for a note-taking app built with React, featuring dynamic components that allow users to create, organize, and manage multiple types of notes.

EXPERIENCE

Full-Stack Developer Intern - EfficaSafe 2026-present

- Build an embeddable Vue 3 widget with Vite and Shadow DOM for full UI and style isolation.
- Integrate REST APIs and enable cross-origin communication via postMessage and custom browser events.
- Automated Python pipeline for turning articles into structured knowledge bases.

Full-Stack Developer - Freelance 2026-present

- Build responsive portfolio and business websites with Vue/ React, Router, Vite, reusable components, dynamic UI and vanilla CSS layouts.

Technical Project Manager - Unit 8200 & Ness Technologies 2023-2025

- Analyze data, write SQL queries, and build automation pipelines to extract insights and optimize workflows.
- Collaborate with developers to design scalable full-stack architectures for diverse information products, including web applications.

Research Team Manager - Israeli Military Intelligence 2022-2023

- Lead an intelligence research team and analyze complex datasets across multiple systems to identify trends and actionable insights.
- Advise and collaborate with developers on integrating intelligence into data-driven solutions.

Operational Team Manager - Israeli Air Force 2020-2022

- Lead a real-time operational team in a high-pressure environment, making rapid decisions and ensuring smooth system performance.
- Analyze system performance and conduct post-event assessments to optimize workflows and processes.

Flight School Cadet - Israeli Air Force 2017-2020

Develop advanced flying skills, perform under pressure, solve complex problems, and collaborate effectively in high-stakes situations.
